This paper was published online on 5 July 2016 with errors in Eqs. (28) and (29). Equation (28) should read as

$$\Omega_{\min}^2 = \frac{\zeta l \omega_m^2}{4 \omega_o r_o \sqrt{I_{\text{opt}} t_m}} \left\{ 3 + 2 \frac{\gamma_m}{\omega_m} \left(1 + \frac{2}{e^{\hbar \omega_m / kT} - 1} \right) \right\}^{1/2} \approx \frac{\zeta l \omega_m^2}{4 \omega_o r_o \sqrt{I_{\text{opt}} t_m}} \sqrt{3 + 4 \frac{\gamma_m}{\omega_m} \frac{kT}{\hbar \omega_m}}. \quad (28)$$

Equation (29) should read as

$$\Omega_{\min}^2 = \frac{1}{r_o \sqrt{m t_m}} \sqrt{2 \gamma_m kT}. \quad (29)$$

The equations have been corrected as of 12 August 2016. The equations are incorrect in the printed version of the journal.
