It was brought to our attention that formulas (15) and (18) in our paper contain a spurious centrifugal term. The correct formulas are as follows:

$$\langle a_z \rangle = - \sum_{\ell, m, j} \frac{c_\ell^m}{r^2(x_j)} \text{Re}[\varphi_{\ell+1}^{m*}(x_j) \varphi_\ell^m(x_j)], \quad (15)$$

$$\langle a_x \rangle = -\frac{1}{2} \sum_{\ell, m, j} \frac{1}{r^2(x_j)} \text{Re}[\kappa_\ell^m \varphi_\ell^{m*}(x_j) \varphi_{\ell+1}^{m+1}(x_j) + \kappa_\ell^{-m} \varphi_\ell^{m*}(x_j) \varphi_{\ell+1}^{m-1}(x_j)]. \quad (18)$$

We acknowledge S. Brennecke for finding these errors. The relative difference in accelerations due to these errors is on the level of 10^{-8} , which is negligible for any of the results reported in our paper.
