In our original paper we made a typographical error in Eq. (50). The $\log x$ in that equation should be replaced by $-\frac{1}{\log x}$. So Eq. (50) should read as follows:

$$n_b = 2S - \frac{1}{\log x} [\log(-\log x) - \gamma] \quad \text{for } g > \frac{1}{2S}.$$

No other results are influenced by this typographical error, including Fig. 3(a) with a plot for this formula.
