In the original paper, Eq. (39) should be corrected to

$$\gamma \approx \frac{3(kr)^2\Gamma}{32\pi} \int_0^{2\pi} \int_0^\pi (\sin \alpha \sin \theta \cos \varphi + \cos \alpha \cos \theta)^2 \sin^3 \theta d\theta d\varphi = \frac{1}{20}(kr)^2\Gamma(1 + \sin^2 \alpha). \quad (39)$$

The corrected form of Eq. (39) was actually used in our calculations. Therefore, this correction does not affect any other results of the paper.
