There is a small error in the expression of the Holevo Cramér-Rao bound in Eq. (6), which should be written as

$$\mathrm{Tr}[GCov(\tilde{\varphi})] \geq \min_{\{X_i\}} \{ \mathrm{Tr}(G\mathrm{Re}V) + \|\sqrt{G}\mathrm{Im}V\sqrt{G}\|_1 \},$$

where the second term has been changed from $\|G\mathrm{Im}V\|_1$, and the various symbols are defined in the original text. This term and its replacement coincide when $G\mathrm{Im}V$ is a normal operator. In particular, this is true when G and $\mathrm{Im}V$ commute, but not in general. The proofs and results of the paper are unchanged.

We thank S. Zhou and L. Jiang for spotting the error.
