An error was found in Fig. 2(d) in our article. Absorption-coefficient spectra were accidentally added to the figure. The corrected version with optical conductivity spectra is shown as Fig. 1. The main conclusion and the associated discussion in our article are unchanged.

FIG. 1. Optical conductivity spectra of the as-grown P-SFCO and BM-SFCO thin films. The difference in optical conductivity spectra can be clearly seen. The inset shows the difference in extracted direct-optical-band-gap energies.
