We present a correction to our previous article “Macromagnetic simulation for reservoir computing utilizing spin-dynamics in magnetic tunnel junctions”. There are typographical errors in Eq. (12). The coefficient $-\gamma_0$ in the first term in Eq. (12) should be γ_0 . The third term in Eq. (12) misses the coefficient $1/S$, where S is the total spin angular momentum of the ferromagnetic layer 2 ($S = -\mu_0 M_S A / \gamma_0$). Equation (12) should be revised as follows,

$$\frac{d\mathbf{s}_2}{dt} = \gamma_0 \mathbf{s}_2 \times \mathbf{H}_{\text{eff}} - \alpha \mathbf{s}_2 \times \frac{d\mathbf{s}_2}{dt} + \frac{P}{1 + P^2 \mathbf{s}_1 \cdot \mathbf{s}_2} \frac{I}{-e} \frac{\hbar}{2S} \mathbf{s}_2 \times (\mathbf{s}_1 \times \mathbf{s}_2). \quad (1)$$

Note that these are simply typographical errors, and the simulation results remain correct as originally reported.
