DOI: [10.1103/PhysRevApplied.6.019901](https://doi.org/10.1103/PhysRevApplied.6.019901)

This paper was published online on 27 June 2016 with an error in text. On page 5, the first sentence in the right-hand column should read “However, while this condition is conjectured to be sufficient, it does not exhaust the class of design objectives for which the globally optimal segmentation can be determined using our approach.” The paper has been corrected as of 1 July 2016.
