In the last full paragraph in the left-hand column of p. 144522-2, in the sentence beginning “Specifically, we may add a term to $H \dots$,” the symbol ϕ_j should be replaced by γ_j . Similarly, in the last sentence of that paragraph, ϕ_j should be replaced by γ_j . When the equations of motion resulting from these changes are solved numerically, the results are substantially improved. The evidence for the conclusions of the paper is thus significantly strengthened. Complete numerical results will be presented elsewhere.
