PACS number(s): 75.10.-b, 75.25.+z, 99.10.Cd

In Eq. (B2), there are misprints in the third terms of η_1 and η_2 and the first term of η_4 . The correct expressions for the η 's are

$$\eta_1 = \frac{1}{3} \{ \exp[i\mathbf{k} \cdot (\bar{1}13)] + \exp[i\mathbf{k} \cdot (31\bar{1})] + \exp[i\mathbf{k} \cdot (\bar{1}\bar{3}\bar{1})] \},$$

$$\eta_2 = \frac{1}{3} \{ \exp[i\mathbf{k} \cdot (1\bar{1}3)] + \exp[i\mathbf{k} \cdot (13\bar{1})] + \exp[i\mathbf{k} \cdot (\bar{3}\bar{1}\bar{1})] \},$$

$$\eta_3 = \frac{1}{3} \{ \exp[i\mathbf{k} \cdot (11\bar{3})] + \exp[i\mathbf{k} \cdot (\bar{3}11)] + \exp[i\mathbf{k} \cdot (1\bar{3}1)] \},$$

$$\eta_4 = \frac{1}{3} \{ \exp[i\mathbf{k} \cdot (\bar{1}\bar{1}\bar{3})] + \exp[i\mathbf{k} \cdot (\bar{1}31)] + \exp[i\mathbf{k} \cdot (3\bar{1}1)] \}.$$

The remainder of the paper is unaffected by this correction.
