A typographical error has been identified in Fig. 6(a) of the original published paper where the legends for ${}^{198}\text{Au}$ and ${}^{196}\text{Au}$ (neutron transfer channels of the ${}^6\text{Li} + {}^{197}\text{Au}$ system) were interchanged. In this erratum, the revised version of Fig. 6 is shown with the correct legend in panel (a) in which the cross sections for ${}^{198}\text{Au}$ are indicated by filled triangles, and those for ${}^{196}\text{Au}$ are indicated by filled circles. The values of the cross sections plotted in the figure remain unchanged. It should be mentioned that the original paper reported the neutron transfer channel cross sections obtained from our experiment and no further investigations or calculations were performed using these cross sections. Thus, results of the published paper are not affected.

FIG. 6. Revised version of Fig. 6 from the original paper. Measured cross sections for n transfer, d capture, and α capture for ${}^6\text{Li} + {}^{197}\text{Au}$ [panels (a)–(c)] and for ${}^7\text{Li} + {}^{197}\text{Au}$ [panels (d)–(f)] systems. Different residues, ${}^{196,198,199}\text{Au}$, ${}^{197,198,199}\text{Hg}$, and ${}^{199,200}\text{Tl}$ are indicated in each panel. Note that legends for ${}^{198}\text{Au}$ and ${}^{196}\text{Au}$ were interchanged in panel (a) of the original paper.
