In our paper we stated that “in [1] only the M_0^s , u , x , and z terms were used for FF branches,” and we discuss comparison with this “simplified operator.” The authors of Ref. [1] have pointed out to us that their formalism is different from ours, and that the full operator is taken into account by the J_v and ρ_A terms of footnote 16 of Ref. [1]. Thus the curves labeled “Simp. Oper.” in Figs. 2(a) and 2(b) in the paper do not represent the approximation used in Ref. [1]. As a consequence, our remarks about the difference between our results and those of Ref. [1] are not correct.
