There is an inadvertent typographical error in Eq. (4) where we misplaced the (df_L/dr) and (dg_L/dr) in the brackets in the numerator, when we wrote

$$\Delta_L = R \left[\frac{g_L(df_L/dr) + f_L(dg_L/dr)}{g_L^2 + f_L^2} \right]_{r=R}.$$

The correct expression should read

$$\Delta_L = R \left[\frac{g_L(dg_L/dr) + f_L(df_L/dr)}{g_L^2 + f_L^2} \right]_{r=R},$$

which is the expression we used to obtain the numerical results, figures, discussions, and the equations in the paper.
