A misprint in Eq. (38) has been discovered; the inverse of the numerator of the last term on the right-hand side had been given inadvertently. The expression was coded correctly, and so none of the results will change; it was only a typographical error in the article itself.

Equation (38) was given as

$$\rho(S_n) = \frac{\sigma^2}{D_0} \frac{(1 \pm \alpha)/2}{(I_t + 1) \exp[-(I_t + 1)^2/2\sigma^2] + I_t \exp[-I_t^2/2\sigma^2]},$$

and this should however be corrected to

$$\rho(S_n) = \frac{\sigma^2}{D_0} \frac{2}{1 \pm \alpha} \frac{1}{(I_t + 1) \exp[-(I_t + 1)^2/2\sigma^2] + I_t \exp[-I_t^2/2\sigma^2]}.$$

None of the results presented in the article are affected by the misprint.

The authors thank L. Crespo Campo for discovering the misprint.
