DOI: [10.1103/PhysRevC.97.049903](https://doi.org/10.1103/PhysRevC.97.049903)

In expression (6), a missing factor $(2\pi)^3 \delta^3(\mathbf{k}_1 - \mathbf{p})$ should be inserted inside the integral, which removes the $\mathbf{k}_1$ integration and makes the $\mathbf{p}$ dependence of C_+ for $\Upsilon(1S)$ explicit. The results of the original paper remain unchanged.
