DOI: [10.1103/PhysRevC.98.059901](https://doi.org/10.1103/PhysRevC.98.059901)

The caption of Fig. 2 contains an incorrect statement. As already indicated correctly in the text (see page 5, last paragraph in the second column), the caption should instead state that the plotted function is proportional to “... and valence space dimension 4Ω .” (rather than proportional to “... and pair coupling constant G .”).

Accordingly, the second sentence in the caption of Fig. 2 should read, “This function is proportional to the two-neutron or two-proton or, for $N = Z$, the neutron-proton pair vibrational correlation energy for a constant single-nucleon level spacing $1/g$ and valence space dimension 4Ω .”
