**Erratum: Gravitational waves from the quasicircular inspiral
of compact binaries in Einstein-aether theory
[Phys. Rev. D 101, 044002 (2020)]**

Some errors with Eqs. (6.11) and (6.14) occur. In particular, Eq. (6.11) should read

$$A_{ppE}^{(I,N)}(f) = A_{GR}^{(2)} \left[\rho_{ppE}^{(N)} + (\mathcal{U}_I)^{\tilde{a}_{ppE}^{(I)}} \sum_{k=0}^{\infty} \tilde{\alpha}_{ppE,k}^{(I,N)} (\mathcal{U}_I)^k \right]. \quad (1)$$

Accordingly, Eq. (6.14) should be

$$A_{ppE}^{(2,N)}(f) = A_{GR}^{(2)} [\rho_{ppE}^{(N)} + (\mathcal{U}_2)^{\tilde{a}_{ppE}^{(2)}} \tilde{\alpha}_{ppE,0}^{(2,N)}], \quad (2)$$

here, the $\rho_{ppE}^{(N)}$'s read

$$\begin{aligned} \rho_{ppE}^{(T)} &= \kappa_3^{-1/2}, \\ \rho_{ppE}^{(S)} &= \kappa_3^{-1/2} \frac{g_{b1} F_b \sin^2 \vartheta + g_{L1} F_L \sin^2 \vartheta}{g_+ F_+ (1 + \cos^2 \vartheta) - i g_{\times} F_{\times} \cos \vartheta}, \\ \rho_{ppE}^{(V)} &= \kappa_3^{-1/2} \frac{g_{X1} F_X \sin(2\vartheta) - i g_{Y1} F_Y \sin \vartheta}{g_+ F_+ (1 + \cos^2 \vartheta) - i g_{\times} F_{\times} \cos \vartheta}. \end{aligned} \quad (3)$$

With these corrections, all the 0th-PN terms are kept, and our major results, i.e., Eqs. (6.17) and (6.18), remain the same.

In addition, a typo in Eq. (3.29) happens, in which β_2 should be written as

$$\beta_2 \equiv \frac{c_{14} - 2c_+}{2c_{14}(1 - c_+)c_S^2}. \quad (4)$$

Note that this is simply a typo that does not propagate, and as a result, nothing else is affected.
