The low energy constants $\bar{c}_0$, c_0 , c_3 , and c_4 in Eq. (B6) in the Appendix should be replaced with the following expressions:

$$\begin{aligned}\bar{c}_0 &= \frac{1}{2}\alpha_0 - \frac{1}{36}\alpha_1 + \frac{1}{36}\alpha_2 = -0.32 \text{ GeV}^{-1}, & c_0 &= \alpha_0 - \frac{1}{6}\alpha_1 - \frac{1}{6}\alpha_2 = -0.61 \text{ GeV}^{-1}, \\ c_3 &= \frac{1}{2}\alpha_6 + \frac{1}{2}\alpha_7 = -0.84 \text{ GeV}^{-1}, & c_4 &= \alpha_3 = \frac{\alpha'}{4\pi f}.\end{aligned}\quad (1)$$

Accordingly, Eq. (19) and the numbers in Tables I, II, and III should also be updated. The adjustment lies within the theoretical error of the LEC estimation, and our main conclusions do not change. However, one should remove $T_{\eta\Lambda_c}^{(0)}$, $T_{\pi\Sigma_c}^{(1)}$, and $T_{\pi\Sigma_c^*}^{(1)}$ from the convergent T matrices and add $T_{\bar{K}\Sigma_c}^{(3/2)}$ and $T_{\bar{K}\Sigma_c^*}^{(3/2)}$ in the third paragraph in Sec IV.

There were typos in Eqs. (B2), (B5), (B6), and (19). “GeV” should be replaced with “GeV^{−1},” and T_{123} and T_{132} should read as

$$T_{123} = \frac{1}{2}\Sigma^0 - \frac{1}{2\sqrt{3}}\Lambda, \quad T_{132} = -\frac{1}{\sqrt{3}}\Lambda. \quad (2)$$
