This paper was published online on 7 March 2016 with typographical errors in Eq. (4.37) and in the text on page 10. Equation (4.37) should read as “ $f_{x,s,\text{NSVZ}} = 1 - \frac{\gamma_m}{b_1} = 1 - \frac{\gamma_m}{3-r}$.” On page 10, right-hand column, the tenth and eleventh lines in the second paragraph should read as “Eqs. (4.35)–(4.37). Since the factor $f_{x,cf,\text{NSVZ}}$ has no zero, one thus calculates the IR zero as the zero in $f_{x,s,\text{NSVZ}}$.” The paper has been corrected as of 10 March 2016. The text and equation are correct in the printed version of the journal.
