Due to a trivial algebraic mistake, the numerical values quoted in Eq. (15) of our paper are incorrect. The correct values read

$$d_2^\perp = (208.0 \pm 0.1)C_A + (-37.191 \pm 0.006)T_F n_f. \quad (1)$$

This change only has a minor effect on the cross section for $pp \rightarrow Z \rightarrow e^+e^-$ shown in Fig. 2 of the paper, but for completeness we provide here an updated version. The remainder of the paper is unaffected.

FIG. 1. Corrected version of the right panel of Fig. 2 in the paper.

ACKNOWLEDGMENTS

We thank Guido Bell and Rudi Rahn for detecting the mistake.
