Erratum: Closing the gap on R_{D^*} by including longitudinal effects [Phys. Rev. D **98**, 056014 (2018)]

J. E. Chavez-Saab and Genaro Toledo

(Received 8 May 2019; published 23 May 2019)

DOI: [10.1103/PhysRevD.99.099901](https://doi.org/10.1103/PhysRevD.99.099901)

After publication, we found a bug in the transcription code for the numerical integration. Here we present the corrected values for Table I. Thus, the results on $R_{D\pi}$ are consistent with R_{D^*} at the current precision (uncertainties from the form factors are ± 0.003). This modifies our previous finding that led us to a different conclusion.

TABLE I. Contribution to the branching ratio of the transversal, longitudinal, and interference parts of the amplitude for all three lepton flavors. Quantities are given in percentage. The last two rows show the value of $R_{D\pi}$ as each contribution is added subsequently from left to right for e and μ .

	Transversal	Longitudinal	Interference
Electron	4.6(3)	$5.0(3) \times 10^{-6}$	$3.2(2) \times 10^{-3}$
Muon	4.6(3)	$5.0(3) \times 10^{-6}$	$3.2(2) \times 10^{-3}$
Tau	1.16(8)	$1.1(6) \times 10^{-6}$	$6.4(2) \times 10^{-4}$
$R_{D\pi}^e$	0.25221	0.25221	0.25217
$R_{D\pi}^\mu$	0.25330	0.25330	0.25327
