A typographic error is present in Eq. (4) of the original paper. The Rayleigh wave velocity V_R should instead be the speed of sound in the liquid c as shown below:

Original form (with the error)

$$P = \int_0^\infty \rho w V_R \dot{\eta}^2 dy,$$

corrected form

$$P = \int_0^\infty \rho w c \dot{\eta}^2 dy,$$

This correction only has a minor effect on the results reported in the paper because the scaling is identical and V_R and c are on the same order of magnitude.
