This paper was published online on 7 September 2016 with an error in Eq. (8) and in Fig. 16. Equation (8) should read as

$$\vec{R}(x,y) = \begin{pmatrix} r_x \\ r_y \\ r_z \end{pmatrix} = \vec{\nabla} \times \vec{F}(x,y)$$

The equation and figure have been corrected as of 18 April 2018. The equation and figure are incorrect in the printed version of the journal. For the benefit of the print readership, the figure and its caption are replicated below.

FIG. 16. Rotation range (from minimum to maximum) during the different phases and for each configuration. The following legend is used: circle for the 5/1 configuration, square for the 4/2 configuration, diamond for the 3/3 configuration, and triangle for the 6/0 configuration.
