DOI: [10.1103/PhysRevFluids.6.089902](https://doi.org/10.1103/PhysRevFluids.6.089902)

During our ongoing experiments, we noticed a calibration issue with the acceleration measurement in our system which led to acceleration amplitudes ten times higher than the actual values. Consequently, the experimentally measured driving acceleration amplitude γ_0 including also γ_B and γ_F should be multiplied by a factor of 0.1.

This correction applies to Figs. 1, 3, 4, 5, 8, and 9.

This error does not affect the results and conclusions of the article.
