In November 2007, the Scientific Ethics and Research Conduct Committee of the University of Tsukuba reported that improper data analyses were conducted in two figures (Figs. 1 and 3) in the above mentioned Letter. Subsequent to the report, 23 coauthors of the manuscript have requested that their names be withdrawn from the Letter; and Dr. Numakura, though he states that he cannot confirm or disprove the conclusions of the report, has also requested that his name be removed. The remaining three coauthors, T. Cho, M. Hirata, and V. P. Pastukhov, affirm the basic integrity of the Letter.
