In Eq. (2) of the Letter, we derived the expression of UMR based on the Boltzmann transport theory. In the equation, the integration is taken over k_x , the momentum along the x direction. Here, the derivative symbol d was missing after the integral. Namely, Eq. (2) should be corrected as

$$\Delta R_{xx} \propto j_x \int dk_x \left(-\frac{1}{\tau^+} + \frac{1}{\tau^-} \right) \left(\frac{\partial^2 f}{\partial E^2} \right). \quad (2)$$

This typo does not alter any conclusions drawn in the paper.
