It has come to our attention that in this Letter, two drafting errors occurred in Fig. 2, which had no consequence for the end results or the conclusions: (i) The label points on the y axis of the upper part of the right panel should have been marked 2 and 3 (instead of 1 and 2); (ii) the data point corresponding to the angle 69° for the 747-keV transition (uppermost left panel) was placed slightly off its true location. All other labeling on this and other figures is correct, as are the fits shown in the original figure, and all the numbers listed in Table I. The corrected Fig. 2 is provided.

FIG. 2. This figure replaces the original Fig. 2. The caption remains unchanged.
