ers and V. L. Teplitz, Phys. Rev. 158, 1365 (1967).

⁵S. Weinberg, Phys. Rev. Lett. 13, 1264 (1967);

A. Salam, in *Proceedings of the Eighth Nobel Symposium on Elementary Particle Theory, Ålvsborg, Sweden, 1968*, edited by N. Svartholm (Almqvist and Wiksell, Stockholm, 1968); G. 't Hooft, Nucl. Phys. B35, 167 (1971); B. W. Lee, Phys. Rev. D 5, 823 (1972); B. W.

Lee and J. Zinn-Justin, Phys. Rev. D 5, 3121, 3137, and 3155 (1972).

⁶P. W. Higgs, Phys. Rev. Lett. 12, 132 (1964); G. S. Guralnik, C. R. Hagen, and T. W. Kibble, Phys. Rev. Lett. 13, 585 (1964).

⁷E. Abers, R. A. Keller, and V. L. Teplitz, Phys. Rev. D 2, 1757 (1970); see also Ref. 1.

ERRATA

π^0 PHOTOPRODUCTION FROM NEUTRONS.

A. M. Osborne, A. Browman, K. Hanson, W. T. Meyer, A. Silverman, F. E. Taylor, and N. Horwitz [Phys. Rev. Lett. 29, 1621 (1972)].

Reference 12 should read as follows: E. N. Argyres, A. P. Contogouris, S. Ray, and M. Svec, Nucl. Phys. B45, 267 (1972).

PHOTOMAGNETIC POSITRONIUM-SPIN CONVERSION IN SOLIDS. Werner Brandt and Paul Kliauga [Phys. Rev. Lett. 30, 354 (1973)].

The sentence preceding Eq. (3) should read as follows: "As a result, p -Ps contributes to the o -Ps concentration in the sample at the conversion rate $\kappa_p(x)$, and o -Ps to the p -Ps concentration at the conversion rate $\kappa_o(x)$, where $\dots$ "

The text at the beginning of the second column on p. 357 should read, " $\dots$ these values indicate relatively large Ps diffusion constants for open molecular solids, ranging from 10^{-2} cm²/sec in the polar glasses to 10^{-1} –1 cm²/sec in the Van der Waals solids benzene and cyclohexane."

MOLECULAR DYNAMICS BY LIGHT SCATTERING IN THE CONDENSED PHASES OF Ar, Kr, AND Xe. P. A. Fleury, J. M. Worlock, and H. L. Carter [Phys. Rev. Lett. 30, 591 (1973)].

A textual reference to Ref. (7) following Eq. (1) was inadvertently omitted. Also, Ref. (7) is correctly given as P. A. Fleury, W. B. Daniels, and J. M. Worlock, Phys. Rev. Lett. 27, 1493 (1971).
