ERRATA

Kolmogorov-Arnol'd-Moser Barriers in the Quantum Dynamics of Chaotic Systems. T. GEISEL, G. RADONS, and J. RUBNER [Phys. Rev. Lett. **57**, 2883 (1986)].

Equation (10) must be corrected by a factor of $\hbar$ and should read

$$\langle m\hbar | \hat{U} | m'\hbar \rangle = i^{m-m'} e^{-i\hbar m^2/2} J_{m'-m}(k/\hbar). \quad (10)$$

The results of the paper are not affected.

Comment on "Transverse Electromagnetic Waves with $\mathbf{E} \parallel \mathbf{B}$." H. ZAGHLOUL, K. VOLK, and H. A. BUCKMASTER [Phys. Rev. Lett. **58**, 423 (1987)].

Attention is drawn to a serious typographical error in the conclusion of the comment. One of the conditions of $\mathbf{E} \parallel \mathbf{B}$ transverse electromagnetic (TEM) waves should be $d\mathbf{A}_+(\eta)/d\eta \neq d\mathbf{A}_-(\xi)/d\xi$ rather than $d\mathbf{A}_+(\eta)/d\eta \parallel d\mathbf{A}_-(\xi)/d\xi$. Also note that TEM waves with $\mathbf{S}(\mathbf{r}, t) = 0$ are $\mathbf{E} \neq \mathbf{B}$ traveling and standing waves rather than $\mathbf{E} \perp \mathbf{B}$ traveling and standing waves. Reference 4 should be J. Phys. A **19**, L101 (1986).

New Value for the Rydberg Constant from the Hydrogen Balmer- β Transition. PING ZHAO, W. LICHTEN, HOWARD LAYER, and JAMES BERGQUIST [Phys. Rev. Lett. **58**, 1293 (1987)].

On page 1293, three lines from the top of the right-hand column, "the He-Ne, CH_3 laser" should read "the He-Ne, CH_4 laser."

On page 1294, six lines from the top of the first paragraph of the right-hand column, " 30 mW/cm^2 " should read " 3 mW/cm^2 ."

In Table II, measured λ for D, $4P_{3/2}$, " $1.322437(8)$ " should read " $1.3222437(8)$."
