In the original version of our published paper, we erroneously calculated the ground-state Ce-ion g factors as $g_c = 0.31$, $g_{ab} = 0.09$ in KCeO_2 (Table II) and $g_c = 0.64$, $g_{ab} = 0.10$ in the idealized structure with cubic CeO_6 octahedra (Table III). The corrected g -factor values are $g_c = 0.18$, $g_{ab} = 1.32$ in KCeO_2 and $g_c = 2.82$, $g_{ab} = 0.30$ in the idealized structure. These corrections do not affect the discussion in our paper.
