Announcement: 10 Years of *Physical Review Special Topics - Accelerators and Beams*

On 14 May 2008, *Physical Review Special Topics - Accelerators and Beams* is celebrating its 10th anniversary. *PRST-AB* was founded by Robert Siemann and the APS in 1998 to provide the accelerator community with its own journal, covering all aspects of accelerators from fundamental physics to technology. *PRST-AB* has also been an innovator in scientific publishing, with numerous advanced and novel features: It is an all-electronic journal, features conference or special editions, exhibits aspects of a virtual journal, and has pioneered open-access publication. *PRST-AB* is offered at no cost to both authors and readers, through the generous support of its sponsors.

Publications in *PRST-AB* have been growing steadily from initially 24 articles in 1998 to 130–140 articles published per year in 2006/7. In parallel, the number of sponsors has increased substantially from 8 original ones to presently 19, in North America and Europe. The wide sponsorship is recognition of 1) *PRST-AB* as the premier journal of accelerator physics and technology, and 2) the contributions *PRST-AB* is making to the international accelerator community.

To celebrate its 10-year milestone, *PRST-AB* is publishing a number of short essays on general topics of accelerator physics, written by well-known experts in the field. The anniversary essay series starts in May and will be continued throughout the remainder of this year.
