Equation (32) of the above article contains a typographical error. A spurious symbol (ν) at the end of the equation should be omitted. The complete Eq. (32), which describes the decrease of the equilibrium beam radius, is given by

$$R^2 = \frac{\frac{8\nu}{\gamma} + \sqrt{(\frac{8\nu}{\gamma})^2 + 16\hat{B}^2\epsilon^2}}{4\hat{B}^2} \simeq \frac{\epsilon}{\hat{B}}, \quad (32)$$

where $\hat{B} \equiv eB/mc^2$.

The results and conclusions of the article are not affected.
