ERRATA.

Page 64. Preparation and Properties of the Heusler Alloys. The photographs in the right hand column of Fig. 4 from top to bottom are 24, 36, 37, 54; in the left hand column from top to bottom are 44, 41, 38.

Page 324. A New Method of Producing Ripples. After publishing this note Dr. Hugo Schultze called my attention to the fact that he had already described the methods of ripple formation therein discussed. (See *Zeitschrift für Instrumentenkunde*, p. 150, 1906, and p. 151, 1907; also *Tätigkeitsberichten der Phys. Techn. Reichsanstalt*, 1905 and 1906.) I wish to take this opportunity of acknowledging priority to him and to express the regret that the former articles escaped my notice.

A. H. PFUND.
