Subject Areas: Materials Science

This paper was published online on 14 March 2016 with an omission in the Acknowledgments section. On page 7, the Acknowledgment section should read as “This research was primarily supported as part of the Center for the Computational Design of Functional Layered Materials, an Energy Frontier Research Center funded by the U.S. Department of Energy (DOE), Office of Science, Basic Energy Sciences (BES) under Grant No. DE-SC0012575 (the main ideas, theoretical models, calculations, and the analysis), by National Science Foundation (NSF) under Grant No. DMR-1334428 (some of the first-principles calculations), and by U.S. Department of Energy, Office of Science, Basic Energy Sciences, Materials Sciences and Engineering Division (superlattice synthesis). The transmission electron microscopy was accomplished at the Electron Microscopy Center in the Center for Nanoscale Materials at Argonne National Laboratory, a DOE-BES Facility, supported under Contract No. DE-AC02-06CH11357 by UChicago Argonne, LLC. This research used resources of the National Energy Research Scientific Computing Center (NERSC), a DOE Office of Science User Facility supported by the Office of Science of the U.S. Department of Energy under Contract No. DE-AC02-05CH11231. We thank Dr. Hua Zhou for useful discussions. X. W. is grateful for useful discussions with Dr. Andrew J. Shanahan at University Medical Center of Princeton.”

The Acknowledgments section has been corrected as of 25 March 2016.
